

Keeping the World Flowing
for Future Generations

Valve positioners and accessories

Reliability in critical flow control applications

» Reliable operation when it matters

Assured reliability for critical applications and environments. Whether used infrequently or continuously, Rotork products will operate reliably and efficiently.

» Quality-driven global manufacturing

We offer products that have been designed with over 60 years of industry and application knowledge. Our research and development ensures cutting edge products are available for multiple applications across multiple industries.

» Customer focused service and worldwide support

Rotork solve customer challenges and develop new solutions that are tailored to the needs of our clients. We offer dedicated, expert service and support from initial inquiry, to product installation, to long-term after-sales care.

» Low cost of ownership

Long-term reliability prolongs service life. Rotork helps to reduce long-term cost of ownership and provides greater efficiency to process and plant.

› Comprehensive product range serving multiple industries

Rotork products offer improved efficiency, assured safety and environmental protection across sectors such as the Power, Oil & Gas, Water & Wastewater, HVAC, Marine, Mining, Pulp & Paper, Food & Beverage, Pharmaceutical and Chemical sectors.

› Market leaders and technical innovators

We have been the recognised market leader in flow control for over 60 years.

Our customers rely upon Rotork for innovative solutions to safely manage the flow of liquids, gases and powders.

› Global presence, local service

We are a global company with local support. Manufacturing sites, service centres and sales offices throughout the world provide unrivalled customer services, fast delivery and ongoing, accessible support.

› Environmental Social and Governance is at the heart of our business

We have a range of policies in place that support our performance across environmental, social and governance topics. The majority of our policies are publicly available.

Multiple bus connectivity

HART communication

The HART Communication Protocol (Highway Addressable Remote Transducer) is a hybrid, analogue and digital, industrial automation protocol.

HART provides two simultaneous communication channels: the 4-20 mA analogue signal and a digital signal. The 4-20 mA signal communicates the primary measured value. Additional device information is communicated using a superimposed digital signal on the analogue one.

Rotork can offer a complete positioner portfolio from fail-freeze (fail-safe) to fail-safe devices, all including easy handling and commissioning via HART communication protocol.

- Device Description (DD) and Device Type Manager (DTM) files allow the Rotork device to be incorporated into asset management systems
- Up to 63 devices on each network

Foundation Fieldbus

Foundation Fieldbus is a bi-directional communications protocol used for communications among field devices and the control system.

It utilises twisted pair or fibre media to communicate between multiple nodes (devices) and the controller. The controller requires only one communication point to communicate with up to 32 nodes, this is a significant improvement over the standard 4-20 mA communication method which requires a separate connection point for each communication device on the controller system.

- Device Description (DD) files describe the device capabilities to the host system
- Fully compliant with IEC61158-2 standard

Profibus Process Automation (PA)

Profibus manages equipment via a process control system in process automation applications.

The PA variant is designed for use in hazardous areas (Ex zones 0 and 1). The Physical Layer, with over the bus power, limits current flow so that explosive conditions are not created, even if a malfunction occurs. The number of devices attached to a Profibus PA segment is limited by this feature. However, PA uses the same protocol as Profibus DP, and can be linked to a Profibus DP network using a coupler device.

The much faster Profibus DP acts as a backbone network for transmitting process signals to the controller. This means that Profibus DP and Profibus PA can work tightly together, especially in hybrid applications where process and factory automation networks operate side by side.

- Electronic Device Description (EDD) and Device Type Manager (DTM) files allow the Rotork device to be incorporated into asset management systems
- General Station Description (GSD) guarantees device interoperability with all Profibus PLCs

Enhanced diagnostic capabilities

Online diagnostics

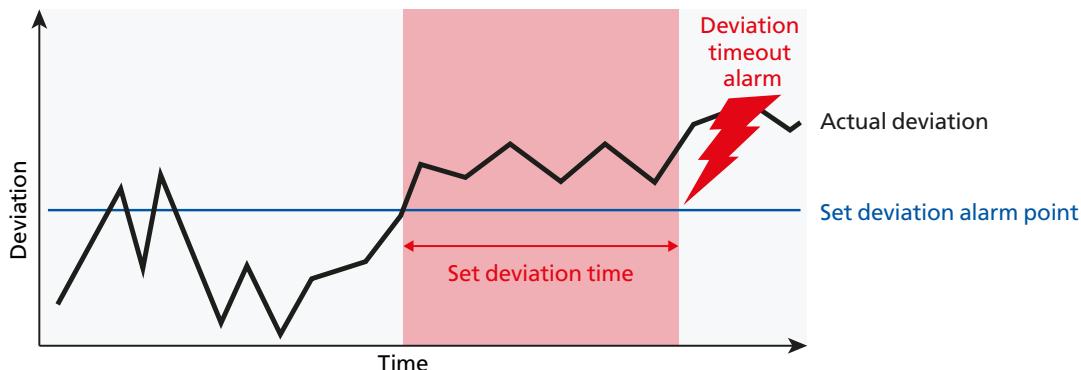

These digital smart positioners employ continuous monitoring and graphic display of valve position, set point target vs time and internal circuit board temperature vs time.

Steady state deviation online analysis can detect:

- Friction in the valve or actuator
- Leakage in pneumatics
- Insufficient supply pressure

A deviation time out alarm occurs when the difference between the target position and the actual position exceeds the preset deviation alarm point (for more than the preset deviation time).

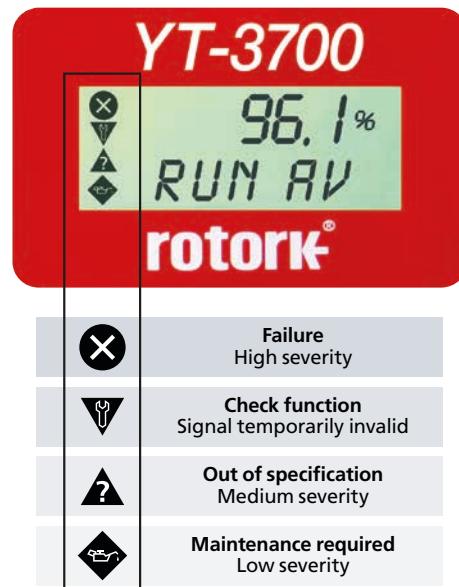

Alarms

Embedded memory can store up to 11 PST test results and up to 20 alarm logs. Through DTM, the history of files will be easy to detect and the valve system integrity easily verified.

Examples of user-configurable alarm/status based on NE107 status signal:

- Critical NVM failure
- Travel sensor failure
- RAM defect
- Drive signal
- Temperature signal
- Deviation
- Travel accumulator
- Cycle counter
- Full close/open count
- PST failure
- Auto calibration failure

Note: Alarm severity can be set by operator

Explanation of on-screen icons

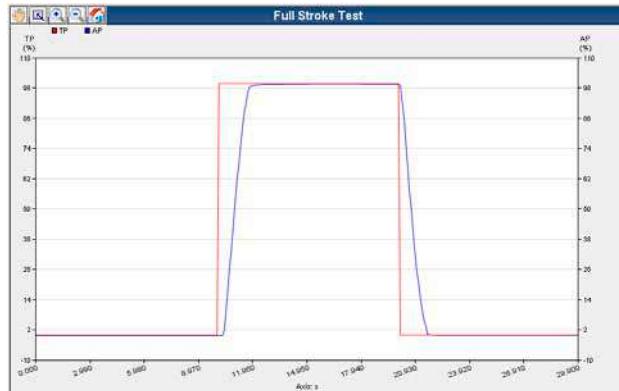

Enhanced diagnostic capabilities

Offline diagnostics

Automated package tests, checking integrity and dynamic behaviour:

- Valve signature
- 25% step test
- Large step test
- Performance step test

These tests provide data to validate system performances. The system allows a reference to be set for further analysis highlighting performance shifts for predictive maintenance.

Partial Stroke Test (PST) capabilities

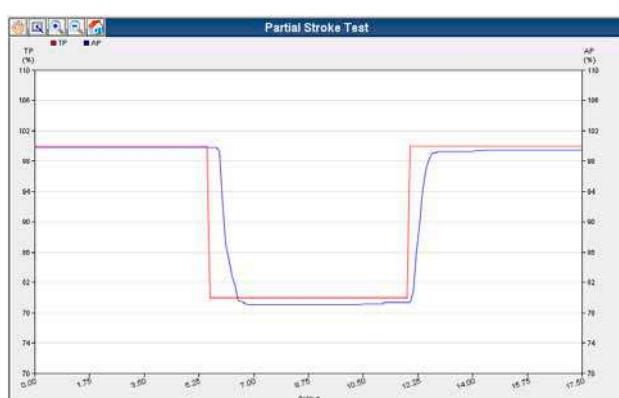

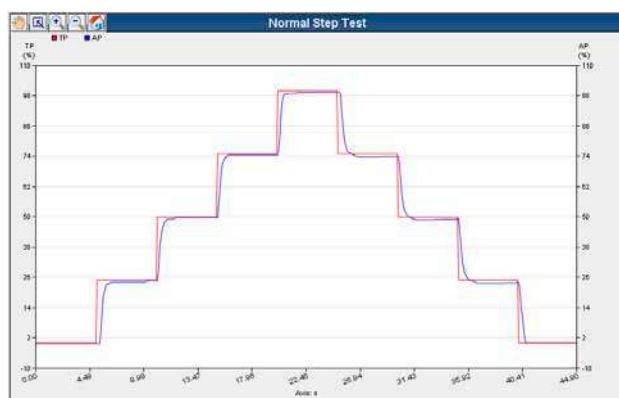

Automated PST functionality:

Configurable parameters

- PST interval [days]
- Position tolerance [%]
- PST start position [%]
- Target position [%]
- PST time out limit [sec]
- Target position hold time [sec]
- PST ramp up/down [%/sec] to reduce risks of overshooting system

Test activation via:

- Local positioner menu
- Remote DI control push button
- Remote HART® connection

Product line compatibility

Enhanced diagnostic capabilities are available for YT-3700, YT-3750, YT-3400 and YT-3450 series.

The above compatibility ensures enhanced diagnostics is available for use in safe and hazardous areas, using intrinsically safe or Ex d explosionproof protection methods. Aluminium or stainless steel construction materials provide flexibility to meet application demands.

Compact smart positioner YT-3100

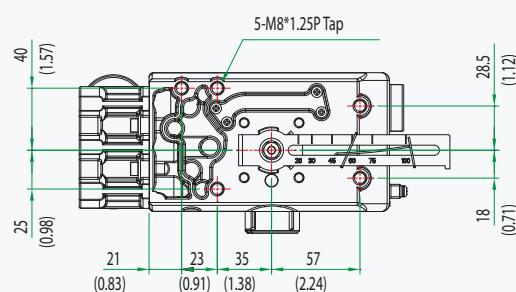

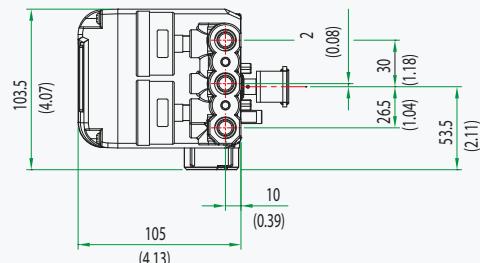

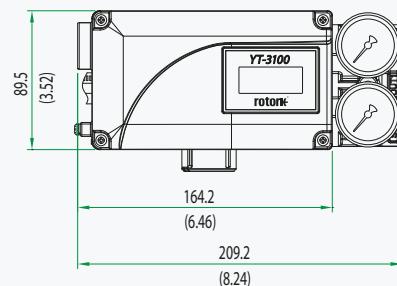

Design features

- **Compact.** Reliable and precise smart positioner, for linear and quarter-turn rotary actuators. Both single- and double-acting layouts are available.
- **Gauge manifold.** An option to keep the unit as compact as possible when gauges are not required.
- **Smart management system.** A clear and easy to navigate menu with four push buttons.

- **Visual self diagnostic.** Rated to NE107 standard for a user friendly and simplified troubleshooting process.
- **Position feedback.** 4-20 mA analogue completes the package, assuring full process control.
- **Non-contact sensor** for increased performance for high frequency operating valves and an enhanced lifetime.

YT-3100 aluminium enclosure
with polycarbonate cover

Dimensions: mm (Inches")

Compact smart positioner YT-3100

Item type		YT-3100
Input signal		4 to 20 mA DC
Supply pressure		0.14 to 0.7 MPa = 1.4 to 7 bar = 20 to 102 psi
Stroke	Linear type	10 to 150 mm (0.4 to 6")
	Rotary type	55 to 110°
Impedance		Max. 500 Ω @ 20 mA DC
Air connection		Rc ¼, ½ NPT
Gauge connection		Rc ⅛, ⅜ NPT
Conduit		G ½
Operating temp.		-30 to +85 °C (-22 to +185 °F)
Linearity		±0.5% F.S.
Hysteresis		±0.5% F.S.
Sensitivity		±0.2% F.S.
Repeatability		±0.3% F.S.
Air consumption		Below 2 LPM (sup = 0.14 MPa) Below 0.07 CFM (sup = 20 psi)
Flow capacity		70 LPM (sup = 0.14 MPa) 2.47 CFM (sup = 20 psi)
Output characteristics		Linear, EQ%, quick open, user set
Material		Housing: aluminium diecasting Cover: polycarbonate
Ingress protection		IP66
Explosion protection type		ATEX / IECEEx / CCC Ex ia IIC T5/T6 Gb KCs Ex ia IIC T5/T6 NEPSI Ex ia IIC T5/T6 Gb Ambient temp: -30 to +60 °C (T5) / -30 to +40 °C (T6)

Smart positioners YT-3300 / YT-3350

Torque motor technology with communications

Design features

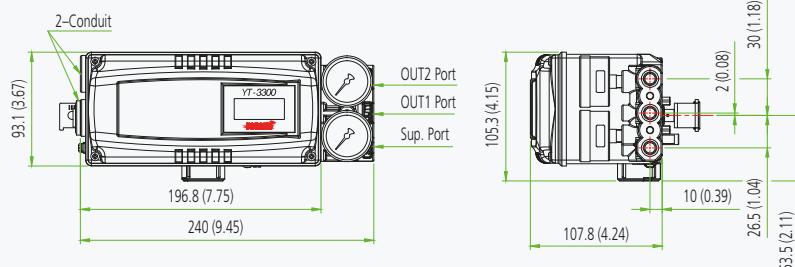

- **Auto calibration.** Simple menu structure with options to auto-calibrate all parameters or zero and end points only.
- **LCD display.** Alphanumeric digital display for process values and calibration.
- **Partial Stroke Test (PST).** Fully-adjustable Partial Stroke Test. All functionality can be performed and selected locally, through push buttons, or remotely with communication protocol.
- **Feedback signal.** Analogue and digital feedback signals with 4-20 mA, mechanical and proximity switch options.
- **PID control.** Pre-calibrated and user-configurable variables via front panel pushbutton menu.
- **Auto / manual switch.** Enables closed-loop automatic valve position control or manual positioning via the A/M switch. The manual mode is useful for troubleshooting, calibration, system testing or as a manual bypass.
- **HART® communication.** Allows commands, position feedback and diagnostics to be sent digitally over the current loop.
- **Profibus Process Automation (PA).** Manages equipment via a process control system in process automation applications. The PA variant is designed for use in hazardous areas (Ex zones 0 and 1). The Physical Layer, with over the bus power, limits current flows so that

explosive conditions are not created, even if a malfunction occurs. The number of devices attached to a PA segment is limited by this feature. However, PA uses the same protocol as DP, and can be linked to a DP network using a coupler device. The much faster DP acts as a backbone network for transmitting process signals to the controller. This means that DP and PA can work tightly together, especially in hybrid applications where process and factory automation networks operate side by side.

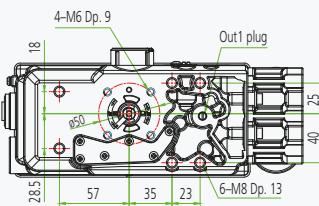

- **Foundation Fieldbus.** A bi-directional communications protocol used for communications among field devices and the control system. It utilises twisted pair or fibre media to communicate between multiple nodes (devices) and the controller. The controller requires only one communication point to communicate with up to 32 nodes, this is a significant improvement over the standard 4-20 mA communication method which requires a separate connection point for each communication device on the controller system.
- **Front panel pushbuttons for configuration.** Four robust and positive acting pushbuttons for field configuration.
- **Non-contact sensor** for increased performance for high frequency operating valves and an enhanced lifetime.

5 = ½ NPT - ¼ NPT

Communications

0 = None
2 = HART protocol communication

Output options

0 = None
1 = 4 to 20 mA feedback

Operating temp. (non-explosionproof)¹

S = -30 to +85 °C (-22 to +185 °F) (N/A for EAC)
L = -40 to +85 °C (-40 to +185 °F)
A = -55 to +85 °C (-67 to +185 °F) (EAC only)

Cable length (YT-3301/3302 only)

Standard cable length is 5 m.

1 = 5 m
2 = 10 m
3 = 15 m
4 = 20 m

Notes:

- This option is just the normal operating temperature of the product and is not related to explosion protection temperature. See certificates for explosion protection temperature.

Smart positioners YT-3700 / YT3702 / YT-3750

Digital smart positioner with enhanced diagnostics

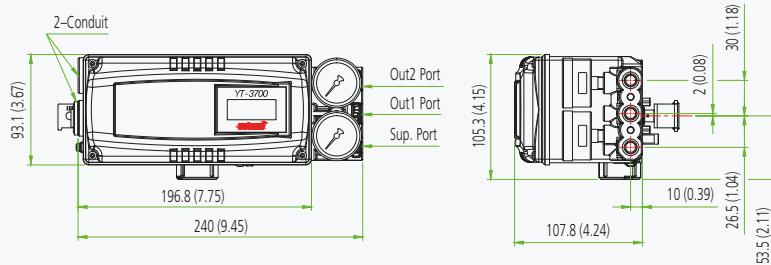

Design features

- **Enhanced diagnostic** (including offline and online) to fully check the integrity of the system. Valve signature, advanced step tests and Partial Stroke Testing (PST) can be operated from local or remote positions. Device Description (DD) and Device Type Manager (DTM) files allow for full software compatibility.
- **Visual diagnostic info** to NE107 standard for a user-friendly analysis with a severity alarm scale and a clear visual identification locally on the display or remotely through HART®.

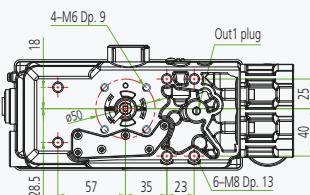

- **Digital input/output configurable** depending on the application and customer preferences. Multiple options are available e.g. start a pre-set PST event or receive error alarms, tailoring interaction with the device as necessary.
- **Auto tuning** functionality.
- **Non-contact sensor** for increased performance for high frequency operating valves and an enhanced lifetime.

L = -40 to +80 °C (-40 to +176 °F)

A* = -55 to +80 °C (-67 to +176 °F) (EAC only)

Notes:

1. Please put the name of the certificate in a purchase order.

2. Limit switch (or digital output): DC 24V (50mA) and transistor type.

3. This option is just the normal operating temperature of the product and is not related to explosion protection temperature.
See certificates for explosion protection temperature.

* Arctic temperature range for double acting devices is -52 to +85 °C
(-62 to +185 °F).

4. Output options 2 and 3 are not selectable when communication option 5 is selected. Communication option 5 includes digital I/O and digital output is configurable to software limit switch.

Smart positioners YT-2500 / YT-2550 / YT-2501

Piezo technology with communications

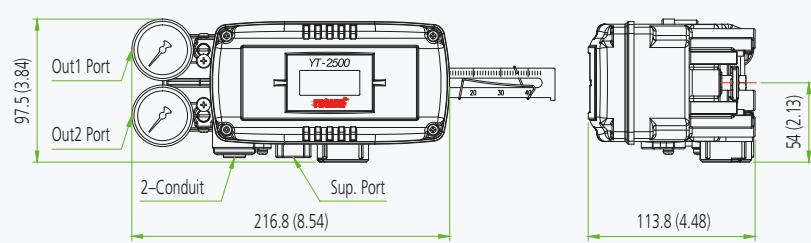

Design features

- **Fail-freeze and fail-safe functions.** Enables the valve to maintain the last position (fail-freeze) or move to a pre-determined position (fail-safe) on the loss of electrical power supply or the pneumatic supply air.
- **Auto calibration.** Simple menu structure with options to auto calibrate all parameters or zero and end points only.
- **LCD display.** Alphanumeric digital display for process values and calibration.
- **Low air consumption level.** Almost zero air leakage.

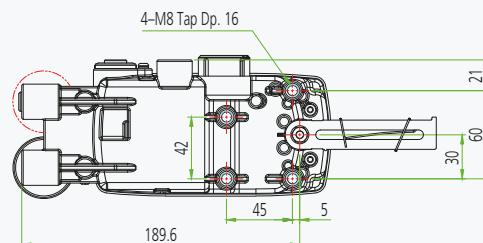

- **Feedback signal.** Analogue feedback signals with 4-20 mA, mechanical and proximity switch options.
- **PD control.** Pre-calibrated and user-configurable variables via front panel pushbutton menu.
- **HART® communication.** Allows commands, position feedback and diagnostics to be sent digitally over the current loop.
- **Front panel pushbuttons for configuration.** Four robust and positive acting pushbuttons for field configuration.

Pneumatic-pneumatic positioner YT-1200

Design features

- Simple zero and span adjustment.** Internal hand dials and locking screws for 0.1 to 1 MPa range adjustments.
- Reverse and direct-acting settings.** Full and $\frac{1}{2}$ split range setting by simple adjustment.
- High vibration resistant.** No resonance between 5 to 200 Hz.
- Auto / manual switch.** Internal adjustment with lock screw safety.

YT-1200 aluminium enclosure

		YT-1200L & YT-1200R	
		Single	Double

Air filter regulators YT-200 / YT-205 / YT-220 / YT-225

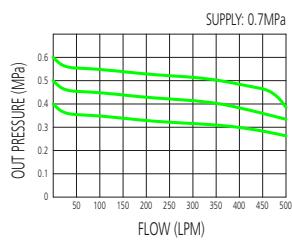

Design features

- Stable output and repeatability.** Provides constant control under variable flow rates and supply pressures.
- Relief flow capability.** Discharges pressure if outer pressure is higher than set pressure.
- Light weight and compact size.** Reduces installation costs.
- Five micron filter.** Protects pneumatic instruments from dirty air.
- Manual or auto draining option**

Rating current	AC 220 V 60 mA (11 W)	
	AC 110 V 130 mA (12 W)	
	DC 24 V 580 mA (14 W)	
Frequency	50 to 60 Hz	
Explosion protection type	KCs Ex d IIC T6	
Connection type	Rc $\frac{1}{4}$, $\frac{1}{4}$ NPT	
Conduit	G $\frac{1}{2}$	
Coil insulation grade	Class F	
Operating temp.	Operating -20 to +70 °C (-4 to +158 °F)	
	Explosion -20 to +50 °C (-4 to +122 °F)	
Weight	0.86 kg (1.9 lb)	1.3 kg (2.8 lb)

Product code

YT-720 - S - P - 1 - 1

Model
YT-720

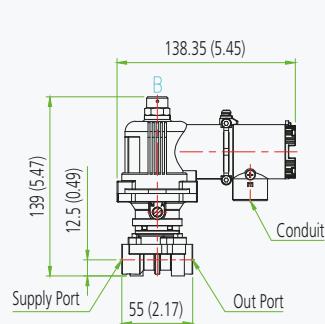

Valve type
S = 3-Way
D = 5-Way

Connection type
P = Rc
N = NPT

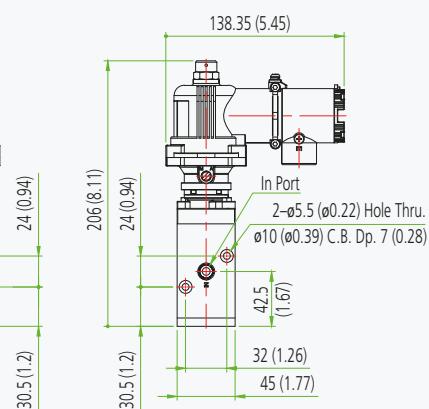

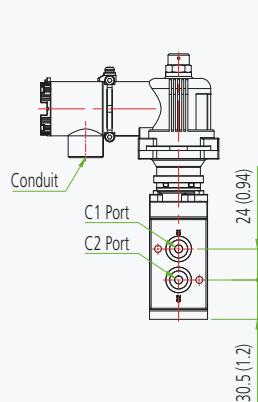

Power source
1 = AC 110 V
2 = AC 220 V
3 = DC 24 V

Pressure
1 = 0 to 0.4 MPa (3-way)
2 = 0 to 0.7 MPa (3-way)
3 = 0.1 to 1.0 MPa (5-way)

Dimensions: mm (Inches")

YT-720S (3-way)

YT-720D (5-way)

Position transmitter SPTM-5V

Design features

- Convenient wiring:** two wire type.
- High accuracy and reliability.** Stable output and repeatability.
- Simple change for RA v.s. DA action setting.**
- Smart setting.** Easy setting of zero and span by pressing the buttons (two or five points setup).

SPTM-5V

Item type	SPTM-5VL	SPTM-5VR
Input type	2 Wire	
Input stroke	10 to 150 mm	55 to 100 °
Output signal	4-20 mA DC	
Load resistance	$R_L \leq \frac{Vs[v] - 9[v]}{I [mA]}$	
Supply voltage	9 to 28 VDC	
Conduit	G ½	
Operating temp.	-60 to +85 °C (-76 to +185 °F)	
Linearity	±1% F.S.	
Hysteresis	±0.2% F.S.	
Sensitivity	±0.2% F.S.	
Explosion protection type	EAC 1Ex ia IIC T5 Gb NEPSI Ex ia IIC T5 Gb	
Ingress protection	IP67	
Material	Aluminium diecasting	
Weight	0.6 kg (1.3 lb)	

Product code

SPTM-5V - L - N - 1 - 0

Model
SPTM-5V

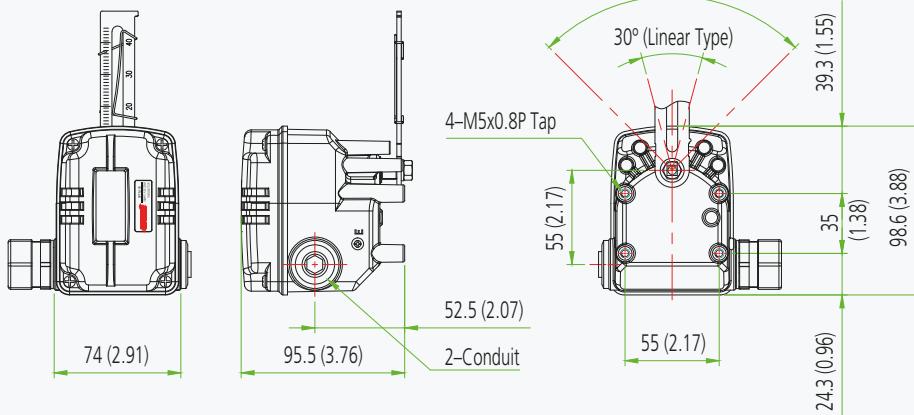

Motion type
L = Linear
R = Rotary

Explosion protection
N = Non-explosion
Z = NEPSI
E = EAC

Lever type
Linear
1 = 10 to 40 mm
2 = 20 to 70 mm
3 = 50 to 100 mm
4 = 100 to 150 mm
Rotary
1 = Standard lever
2 = NAMUR

Option
0 = None
1 = With LCD

Dimensions: mm (Inches")

Position transmitters SPTM-6V / SPTM-65V

Design features

- **Loop powered two wire type.**
- **High accuracy and reliability.** Stable output and repeatability.
- **Reverse or direct acting.** Easy to configure options.
- **Smart setting.** Easy setting of zero and span by pressing the buttons (two or five points setup).

SPTM-6V

SPTM-65V

Item type	SPTM-6V	SPTM-65V
Connection type	2 Wire	
Input stroke	Linear Rotary	10 to 150 mm 55 to 100 °
Output signal	4-20 mA DC	
Load resistance	$R_L \leq \frac{Vs[v] - 9[v]}{I [mA]}$	
Supply voltage	9 to 28 VDC	
Conduit	G ½ or ½ NPT only for NEPSI	
Operating temp.	Operating Explosion	-60 to +85 °C (-76 to +185 °F) KCs, NEPSI: -40 to 60 °C, EAC: -60 to 60 °C
Linearity	±1% F.S.	
Hysteresis	±0.2% F.S.	
Sensitivity	±0.2% F.S.	
Explosion protection type	EAC 1Ex d IIC T6 Gb KCs Ex d IIC T6 NEPSI Ex d IIC T6 Gb	
Ingress protection	IP67	
Material	Aluminum diecasting	Stainless steel 316
Weight	1.3 kg (2.9 lb)	2.8 kg (6.17 lb)

Product code

SPTM-6V - L - C - 1

Model

SPTM-6V = Flameproof aluminium
 SPTM-65V = Flameproof stainless steel

Motion type

L = Linear
 R = Rotary

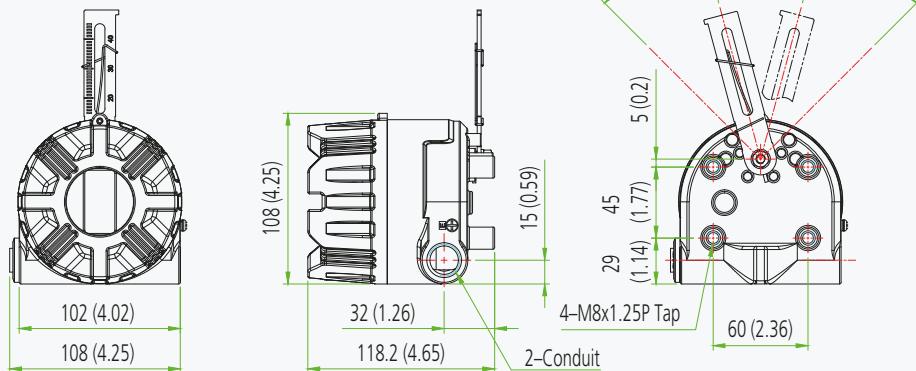

Explosion protection

E = EAC
 Z = NEPSI C = KCs

Lever type

Linear	Rotary
1 = 10 to 40 mm	1 = Standard lever
2 = 20 to 70 mm	2 = NAMUR
3 = 50 to 100 mm	
4 = 100 to 150 mm	

Dimensions: mm (Inches")

Limit switch box YT-850

Design features

- Visual position indicator.** 360° viewing angle.
- Multiple output signals.** Eight contacts of terminal ports.
- Universal compatibility.** Suitable for any rotary motion actuator (ISO5211).
- Easy configuration.** Simple adjustment of cam position.
- Dual conduit entries.** Separate connections for power and signal cables.

Appendix A: Equipment certification requirements for hazardous locations

ATEX & IECEx certificate number

Suffixes: U – component certification
X – special conditions for safe use apply

Apparatus groups [ATEX and IECEx]

Group	Environment	Location	Typical substance
I		Coal mining	Methane (Fire damp)
IIA	Gases, vapours	Surface and other locations	Acetic acid, acetone, ammonia, butane, cyclohexane, gasoline (petrol), kerosene, methane (natural gas) (non-mining), methanol (methyl alcohol), propane, propan-2-ol (iso-propyl alcohol), toluene, xylene
IIB			Di-ethyl ether, ethylene, methyl ethyl ketone (MEK), propan-1-ol (n-propyl alcohol), ethanol (ethyl alcohol)
IIC			Acetylene, hydrogen, carbon disulphide
IIIA			Combustible flyings
IIIB	Combustible dusts	Surface and other locations	Non-conductive
IIIC			Conductive

Apparatus groups (US / CAN)

Substance	Hazard class	NEC 500	NEC 505
Acetylene		Group A	IIC
Hydrogen		Group B	IIC
Ethylene	Class I Flammable gases	Group C	IIB
Propane		Group D	IIA
Methane (mining)		Group D	-
Combustible metal dusts		Group E	-
Combustible carbonaceous dusts		Group F	-
Combustible dusts not in group E or F (Flour, grain, wood, plastics, chemicals)	Class II Combustible dusts	Group G	-
Combustible fibres and flyings	Class III Fibres and flyings	-	-

Classification of divisions and zones

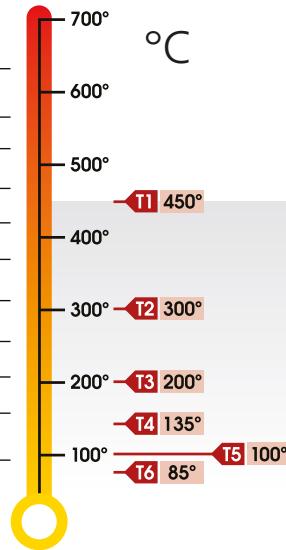

Type of area	NEC and CEC*	ATEX and IEC	Definitions
Continuous hazard	Division 1	Zone 0 / Zone 20 Cat 1	A place in which an explosive atmosphere is continuously present
Intermittent hazard	Division 1	Zone 1 / Zone 21 Cat 2	A place in which an explosive atmosphere is likely to occur in normal operation
Hazard under abnormal conditions	Division 2	Zone 2 / Zone 22 Cat 3	A place in which an explosive atmosphere is not likely to occur in normal operation, but may occur for short periods

* On occasion the ATEX and IEC Zones may be used in the corresponding NEC and CEC system

Temperature classification

Classification of maximum surface temperatures for Group II Electronic Equipment (T Class).

IIA	T1	Ammonia	630°
IIC	T1	Hydrogen	560°
IIA	T1	Methane	537°
IIA	T1	Propane	470°
IIB	T2	Ethylene	425°
IIA	T2	Butane	372°
IIC	T2	Acetylene	305°
IIA	T3	Cyclohexane	259°
IIA	T3	Kerosene	210°
IIB	T4	Di-ethyl ether	160°
IIC	T6	Carbon disulphide	95°

Dusts typical ignition temperatures (°C)

Dusts	Cloud	Layer
Aluminium	590 °C	>450 °C
Coal dust (lignite)	380 °C	225 °C
Flour	490 °C	340 °C
Grain dust	510 °C	300 °C
Methyl cellulose	420 °C	320 °C
Phenolic resin	530 °C	>450 °C
Polythene	420 °C	>450 °C (melts)
PVC	700 °C	>450 °C
Soot	810 °C	570 °C
Starch	460 °C	435 °C
Sugar	490 °C	460 °C

Ingress protection codes

First number (protect from solid bodies)	Second number (protect from water)
0	No protection
1	Objects > 50mm
2	Objects > 12.5mm
3	Objects > 2.5mm
4	Objects > 1.0mm
5	Dust-protected
6	Dust-tight
	7 Temporary immersion
	8 Continuous immersion

Enclosure type ratings (NEMA / CSA / UL)

Type	Area	Brief definition
1	Indoor	General purpose
2	Indoor	Protection against angled dripping water
3, 3R, 3S	Indoor / outdoor	Protection against rain, snow
4, 4X	Indoor / outdoor	Protection against rain, snow, hose directed water
5	Indoor	Protection against angled dripping water, dust, fibres, flyings
6	Indoor / outdoor	Protection against temporary submersion
6P	Indoor / outdoor	Protection against prolonged submersion
12, 12K	Indoor	Protection against circulating dust, fibres, flyings
13	Indoor	Protection against circulating dust, fibres, flyings, seepage

Site services

Rotork understand the value of prompt, punctual and superior site services. Rotork Site Services have specialist expertise, insight and experience in service support for mission-critical flow control and instrumentation solutions for oil and gas, water and wastewater, power, chemical process and industrial applications. We offer global frontline support backed by dedicated in-house experts.

Our service solutions increase plant efficiency and reduce maintenance costs, while workshop services return equipment to as-new condition. Our experience and understanding of the flow control industry means we have extensive insight and ideas of what we can do to provide significant value to our customers and their operations.

Rotork Site Services is comprised of two main areas; Lifetime Management and Site Services. Lifetime Management is the suite of services within Rotork Site Services which help you manage the risk associated with aging assets and includes our Reliability Services offering. Site Services comprises essential actuator service, repair, maintenance and upgrades.

Rotork has specialist expertise, insight and experience in flow control.

We provide insight into how we can deliver value to our customers.

Our service solutions increase plant efficiency and reduce maintenance costs.

Site services

Lifetime Management

The services available within Lifetime Management offer a complete solution to managing the risks associated with the life cycle of your equipment and their obsolescence (which compromise reliable performance and valuable uptime).

The aim of Lifetime Management is to provide you with constant support and minimum- to- no disruption to your production flow. It is a customisable service offering designed to seamlessly maintain and improve your assets. We manage the inherent risks associated with advances in technology, component obsolescence and ageing equipment for you. We are committed to helping customers maximise the continuous, fault-free operation and working life of their actuators. Supporting the continuous and reliable operation of your plant allows for improved performance and increases in valuable uptime.

Lifetime Management covers:

- Reliability Services
 - Basic - health check
 - Standard - planned maintenance
 - Premium - enhanced maintenance
- Upgrade services (retrofit)
- Planned shutdown support
- Life cycle services
- Overhauls/refurbishment
- Customised spares programme
- Intelligent Asset Management (iAM) reporting

Site services

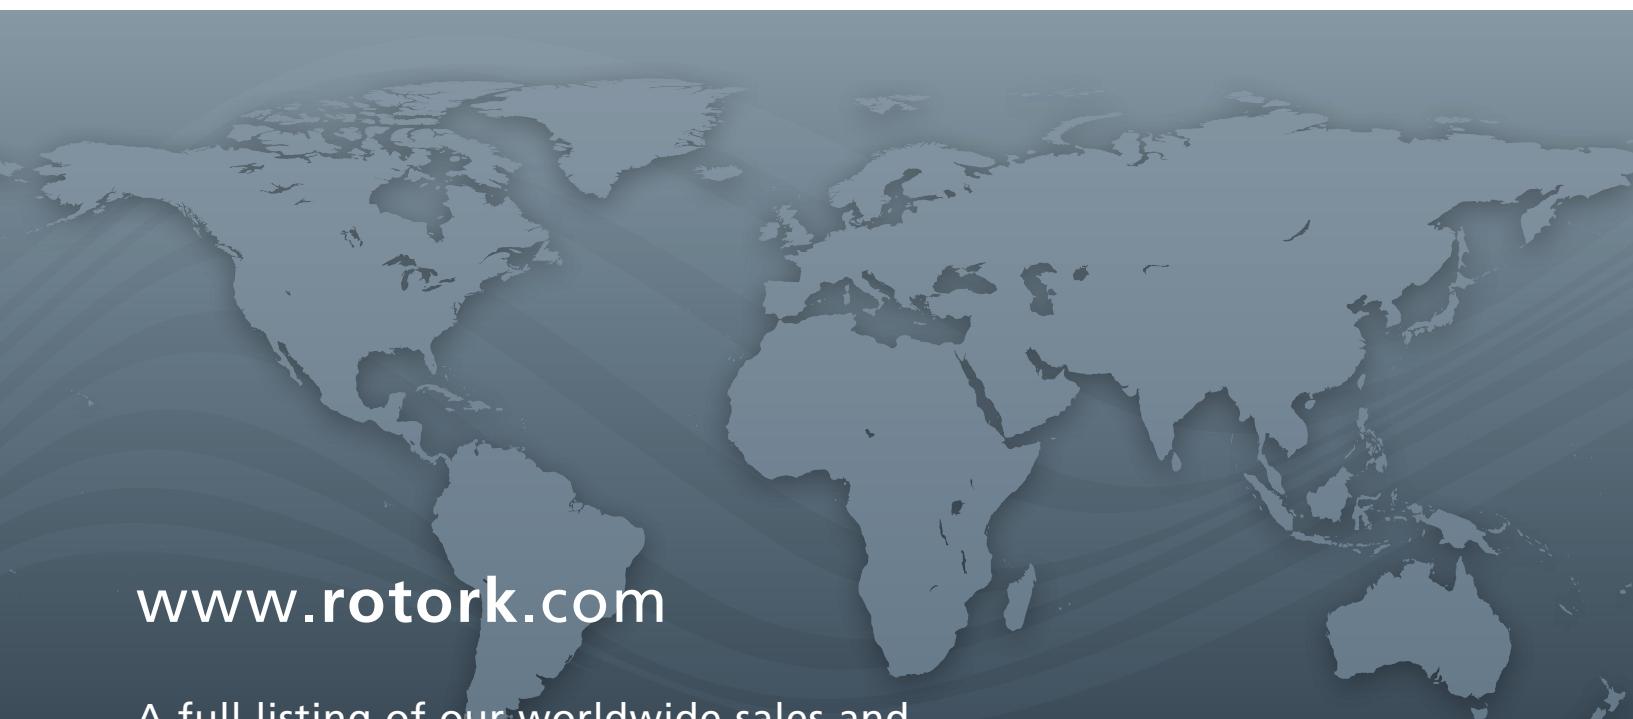

Rotork's Site Services comprises the essential on-site actuator service, repair, maintenance and upgrades part of our service offering, plus the commissioning of new actuators and applications. It includes off-site work completed at a Rotork support centre including recertification, automation, testing and product selection.

Our decades of experience in the industrial actuation and flow control markets means that customers can rely on us to understand their problems and to deliver reliable, economic solutions. Rotork's talented and experienced engineers have an in-depth understanding of the problems that are faced in the field and they know how to fix them.

On sites where providing evidence of valid asset certification is a legal requirement, Rotork engineers can carry out the necessary OEM level inspections and provide the statutory paperwork to comply with regulations.

- Planned shutdown support
- Actuator workshop overhaul
- Field support
- Valve automation services
 - On-site
 - Off-site
- Global support

A faint, grayscale world map graphic serves as the background for the lower half of the page. The map shows the outlines of all major continents against a dark blue gradient.
