

**SPECIFICATION SHEET FOR ROTORK GEARS IBN BEVEL, ISN SPUR  
AND IWN WORM GEAR VALVE OPERATORS SUITABLE FOR USE IN  
NUCLEAR ENVIRONMENTS**

For nuclear zones inside containment areas and outside active containment areas, we offer gearboxes having SG Iron castings (for main housings, baseplate and actuator mounting flange), Viton grade VA75 `o' rings and nuclear MOV long life grade 1 grease.

The temperature range would be 0°C to 150°C.

All gearboxes are finished with PE3 primer suitable for over coating with most conventional paints, polyurethanes, epoxies and chlorinated rubber paints.

Gearboxes to this specification are qualified by Rotork to IEEE382.
